With the mounting popularity of wine in our society, ever increasing numbers of bridal couples are opting for a wedding with a wine theme. One way that couples are enhancing the wine theme is with wine wedding favors.

There are several different types of wedding favors with a wine theme including custom label wine and wedding wine stoppers among others.

With custom labeled wines, you can get bottles of wine personalized for your wedding and use them as favors or as gifts for the wedding party and out of town guests. You can personalize the labels with your wedding date and names as well as a personal message. You can even add a picture to give it an extra personal touch. Depending upon your budget and needs, you can get wines in full bottles or half bottles. At some wineries you can participate in the wine making process and bottle your wine with the help of friends and family. If your reception venue allows it, you can even serve your private label wine at your reception.

Another option for a wine wedding favor is a personalized wine glass or Champagne flute. You can get glasses or flutes etched or imprinted with your names and wedding date to commemorate your special day. You can also add a design like hearts or doves to the glasses. You can then adorn the glasses with ribbon in your wedding colors for an elegant finish.

Wedding wine stoppers have become more popular and now there are more and more options to choose from. Most of these stoppers are made from chrome with a rubber seal to help preserve the wine. You can choose traditional wedding theme wine stoppers with designs like hearts or a bride and groom or you can tailor it to the season of your wedding.

There are wedding wine stoppers with fall leaves and snowflakes, for example, if you are having an autumn or winter wedding.

There are also many wine stoppers that can go with a specific theme, like beach ball or sea shell wine stoppers for an ocean front wedding. There also fairy tale style stoppers. Many of these stoppers come in a gift box and often have tags that can be personalized. Also available are sets that come with both a wine stopper and a corkscrew.

Wine charms are another wine themed item that makes for an inexpensive wedding favor. There are several wedding related wine charm sets available which usually come packaged in a set of four charms. If you want a more personalized option there are wine charms that can be customized with your name and wedding date.

Some other items that are used as wine related wedding favors are sets of coasters with a wine design and wine scented gel candles. The gel candles usually come in different wine scents like Merlot or Chardonnay and come in a petite wine glass.

Wine wedding favors are an easy and inexpensive way to enhance a wine themed wedding. Furthermore, these are wedding favors that most guests will enjoy and use which will remind them of your special day.
